

Tips for a Better Night's Sleep

Daytime lifestyle:

- Keep consistent sleep and wake-up times, even on weekends.
- Avoid high-energy activities within three hours of bedtime.

Diet:

- Be sure that children eat a well-balanced, nutritious diet.
- Limit caffeinated beverages. Remember that some clear sodas and chocolate also contain caffeine!
- Avoid heavy meals near bedtime.

The Bedroom:

- Keep it quiet, dark and not too warm (<75 degrees F).
- Discourage pets in the child's bed.
- Keep the bedroom safe and free of clutter.
- Remove television sets, cell phones, computers and video games.

Bedtime:

- Establish soothing nighttime routines: Tell stories, read and pray with your children.
- Afterward, leave and encourage children to initiate sleep on their own.
